

ANDREW SCHORR

FRONT END SOFTWARE ENGINEER

914-263-5957
afs35mm@gmail.com

<http://andrewschorr.com>
132 Allen St, New York, NY 10002

Full stack software engineer, specializing in Front End technologies, with an eye for design. Additionally, I enjoy working further down the stack with server side architectures, and appreciate a delightful user interface as much as any designer.

EXPERIENCE

4/19 - Present

FRONT END ENGINEER

Amazon

- Developed, documented, and evangelized best practices for a components library in use by multiple teams across the entire organization
- Led development of team's integration of codebase into new eligibility API. Working with API team to develop spec and API signatures
- Worked with engineers within organization to formulate on-boarding roadmap, which reduced time to first commit from a several weeks to just a couple days
- Developed an end-to-end test suite and approval process to move our deployment pipeline to full continuous integration and overhauled testing methodologies to greatly reduce time of deployments
- Migrated end-to-end tests to JavaScript framework which reduced runtimes and increased stability

10/14 - 10/18

PRODUCT ENGINEER

Tumblr

- Modernized Tumblr's entire web platform, porting it to a greenfield, Node and React based stack to bring feature parity with our mobile apps and ease development of future features
- Led development of online status indicator, a cross platform feature to give Tumblr a more real-time feel, resulting in a 5% increase in mobile DAUs and 1.55 million and 3.5% increase in weekly messages sent
- Implemented blog subscription feature on web and API, led RFC meetings and integrated feature with push notification service for mobile apps
- Implemented cross-platform API changes and AB tests, consumed by our mobile apps to support new features, subsequent queries to determine effectiveness of changes
- Wrote RFC documents and lead architecture reviews with product, services, and quality assurance teams to ensure code quality

Fall 2015

VOLUNTEER TRAINER

Code Now

- Taught groups of high school students programming basics in the Ruby language
- Introduced students to the terminal; it's uses and advantages
- Coded a choose your own adventure game, hangman, and tic-tac-toe

1/13 - 10/14

CREATIVE DEVELOPER

AKQA

- Develop a suite of global responsive websites to function across various mobile devices and desktop, in 18 separate language and location combinations
- Responsible for client-side code architecture and organization
- Work for clients include Verizon, Pimco, Olympus

EDUCATION

UNIVERSITY OF WISCONSIN - 2009

B.S. Economics / Madison, WI

EXPERTISE

- Knowledge of and adherence to web standards and best practices, including OWASP web application security recommendations and coursework
- Agile development methods and continuous integration/development
- Experience in developing mobile specific sites; responsive web design
